Shell edges, exposed courts and roof drainage direction.

S · Site and approach

SITE

1:300 0 10 m

Indicative setting. North is up. Section line A-A is marked.

Envelope and structure

Radial concrete ribs rise from the annular base and support paired thin shells. Daylight enters between overlapping shells. The wider western bay frames the river before visitors turn into the music hall.

Environment and access

Provide shaded waiting space before the river crossing. Keep reflecting-water filtration and acoustic isolation independent, and mock up one petal junction at full scale.
