Indicative setting. North is up. Section line A-A is marked.

Envelope and structure

The projecting roof plane is back-spanned into the uphill service wall. The long pool occupies the thicker lower terrace; a separate drainage zone protects the living-room sill from splash and sea spray.

Environment and access

Model wind suction at the thin tip. Inspect waterproofing and provide a repair route along the more sheltered landward edge of the pool.

Drawing key

- Cut envelope
- Glass / seal
- Section datum
- Internal wall
- Furniture / fitting
- Overhead / projected

42 × 26 m; two levels; 9 m roof edge.

Proposed dimensions and levels. Site surveys, engineering, fire strategy, accessibility and local approvals require project-specific verification before construction.
