Envelope and structure

A braced secondary frame carries the metal lobes independently of the rectilinear galleries. A narrow joint at the bridge lets the two gallery bars move separately. North light enters the atrium above the art-handling route.

Environment and access

Keep meltwater out of the water-cut bridge joint. Give conservation rooms a controlled envelope and keep the most light-sensitive displays away from the atrium glazing.

Drawing key

- Cut envelope
- Glass / seal
- Section datum
- Internal wall
- Furniture / fitting
- Overhead / projected

88 × 58 m; three inhabited levels; 28 m lantern.

Proposed dimensions and levels. Site surveys, engineering, fire strategy, accessibility and local approvals require project-specific verification before construction.
